Introduction  
by  
William O. George  
Assistant Geologist  
United States Geological Survey

This publication contains records of wells, drillers' logs of wells, and logs of test wells in Andrews County, Texas. The records were obtained in an inventory made by the Work Projects Administration. The work was started in July, 1936 as Project 6999 in the Lubbock District, with Joe W. Lang, a geologist, as project superintendent. Because of a lack of funds, the work was interrupted in October 1936. By this time, considerable information had been obtained in the southern half of the county and this data was compiled and released on December 2, 1937. The investigation was resumed on July 11, 1939 as Project 13460 in the San Angelo District and with Lloyd G. Davis as project superintendent and completed on September 25, 1939. This release contains the combined data of both projects, which includes 246 well records, 29 drillers' logs, logs of 137 test wells, and 169 chemical analyses.

The analyses were made by chemists employed on Work Projects Administration Project 10443 under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry of The University of Texas, and E. W. Lohr, Chemist of the Quality of Water Division of the Geological Survey; the Bureau of Industrial Chemistry furnished laboratory space and equipment. This release was typed by typists employed on that project.

The records serve as a guide to land owners, well drillers and others who need information regarding springs and wells, the depth to ground water in different parts of the county, and the quantity and chemical character of water yielded by both springs and wells. They afford a basis for the more intensive investigation that is now being carried on by the State Board of Water Engineers in cooperation with the Geological Survey. The purpose of this investigation is to determine the distribution and extent of the available ground-water supplies and the safe yield of the underground reservoirs.

These projects are a part of a State-wide investigation of the underground water resources of Texas, and are sponsored by the Texas State Board of Water Engineers in cooperation with the United States Department of the Interior, Geological Survey.

Records of wells in Andrews County, Texas

(All wells are drilled.)

(See "Logs of W. P. A. test wells" for records of all test wells.)

/ B, bucket; C, cylinder; W, windmill; H, hand; G, gasoline; E, electric; number indicates horsepower.

Records obtained by Lloyd G. Davis, Project Superintendent

o.	Water level below measuring point (ft.)	Depth, Date of measure- ment (ft.)	Pump and power b/	Use of water c/	Topo- graphic situa- tion	Remarks
301	31.2	Aug. 10, 1939	C,W	S	Sink bottom	Reported weak supply.
302	40.2	do.	C,W	S	Rolling	Reported weak supply. Struck water at 45 feet. Drilled by -- Crews.
303	47.9	do.	C,W	S	In draw	Large earthen tank by well. Drilled by Bill Skeen.
304	41.1	Aug. 28, 1939	C,W	S	do.	
305	32.9	do.	C,W	S	Flat	Steel casing.
306	71.0	do.	C,W	S	Gentle slope	Galvanized iron casing.
307	14.2	Aug. 15, 1939	C,W	N	do.	Do.
308	22.3	do.	C,W	S	Edge of sink	
309	17.2	do.	C,H	S	Gentle slope	Reported weak supply. Dug well.
310	42.4	do.	C,W	S	do.	
311	39.1	do.	C,W	S	Flat	Steel casing.
312	5.6	do.	C,W	S	do.	Poor water unfit for domestic use. Reported weak supply.
313	5.9	do.	C,W	D, Ind	do.	Steel casing.
317	42.5	do.	C,W	S	In draw	
318	59.4	Sept. 7, 1939	C,W	S	Flat	Steel casing.
319	27.3	do.	C,W	S	In draw	Salty water. Steel casing.
320	87.1	Sept. 24, 1939	C,W	D	Gentle slope	Reported strong supply.
321	60	e/	C,W	S	Sand hill	
322	84.6	Aug. 8, 1939	C,W	D,S	--	Reported strong supply. No casing. Water from sand and gravel.
325	70.6	Aug. 21, 1939	C,W	D,S	Ridge- top	Reported weak supply from iron casing.
326	29.0	Aug. 9, 1939	C,W	S	Edge of draw	Salty water.
327	49.9	Aug. 23, 1939	C,W	S	Near sink	Wooden casing. Salty water.
328	65.9	Aug. 9, 1939	C,W	S	Rolling	Galvanized iron casing.

c/ D, domestic; S, stock; I, irrigation; Ind, industrial; P, public; RR, railroad; N, not used.

d/ No water sample collected for analysis.

e/ Water level reported.

a/ Measuring point was usually top of casing, pipe clamp or well curb; it was above ground level unless below ground indicated by minus (-) sign.

b/ B, bucket; C, cylinder; W, windmill; H, hand; G, gasoline; E, electric; number indicates horsepower.

No.	Water level Depth below measuring point (ft.)	Date of measurement	Pump and power b/	Use of water c/	Topo-graphic situation	Remarks
473	93	e/	C,W	S	Sand dunes	Steel casing to 15 feet.
474	31.1	Sept. 22, 1939	C,W	S	In draw	Reported capacity 25 gallons a minute.
475	65	e/	C,G	--	Gentle slope	Reported capacity 25 gallons a minute. Drilled by Ed Burk.
476	95	e/	C,W	S	Flat	Steel casing to 15 feet. Reported capacity 6 gallons a minute.
477	100	e/	C,W	S	Sand dunes	Steel casing to bottom with 30 feet perforated at bottom. Drilled by Ed Burk.
478	240	e/	C,W	S	Rolling	Reported capacity 15 gallons a minute. Drilled by E. L. Farmer.
479	100	e/	C,W	S	Gentle slope	Reported capacity 3 gallons a minute; 20 gallons a minute when drilled.
480	100	e/	C,W	S	Rolling	Reported capacity 6 gallons a minute. Steel casing to 15 feet.
481	--	--	--	--	Lake	Shafter Lake, a large lake
482	--	--	--	--	Lake	Small lake. Reported never goes dry and water kills cattle.

c/ D, domestic; S, stock; I, irrigation; Ind, industrial; P, public; RR, railroad;  
N, not used.

d/ No water sample collected for analysis.

e/ Water level reported.

## Partial analyses of water from wells in Andrews County, Texas

(Analyzed at The University of Texas under the direction of Dr. E. P. Schuch, Director of the Bureau of Industrial Chemistry, and E. W. Lohr, Chemist, U. S. Department of the Interior, Geological Survey; by D. F. Riddell, and H. T. Davidson, Chemists; and Martin Vieland, Jack Ramsey and J. H. Raby, Assistant Chemists. Nitrate and fluoride determined by E. W. Lohr. Results are in parts per million. Well numbers correspond to numbers in table of well records.

Well	Owner	Depth of well (ft.)	Date of collection	Total dissolved solids (calc.)	Cal-cium (Ca)	Magne-sium (Mg)	Sodium and Potassium (Na + K) (calc.) a/ Sulphate less than 10 parts per million.

b/ Nitrate less than 20 parts per million.

c/ Analyses of selected wells are given in milligrams equivalents per liter on page 54.

## Partial analyses of water from wells in Andrews County--Continued

Results are in parts per million.

Well	Owner	Depth of well (ft.)	Date of collection	Total dissolved solids (calc.)	Cal- cium (Ca)	Magne- sium (Mg)	Sodium and Potassium (Na + K) (calc.)	Bicar- bonate (HCO <sub>3</sub> )	Sul- phate (SO <sub>4</sub> )	Chlo- ride (Cl)	Ni- trate (NO <sub>3</sub> )	Fluor- ide (F)	Total hardness as CaCO <sub>3</sub> (calc.)

MAP OF ANDREWS COUNTY, TEXAS  
SHOWING LOCATIONS OF WATER WELLS LISTED

SCALE  
0 1 2 3 4 5 6 7 8 MILES

EXPLANATION —

- WELL WITH HANDPUMP, BUCKET,  
OR BAILER
- WELL WITH WINDMILL OR SMALL  
POWER PUMP
- WELL WITH PUMPING PLANT —  
5 HORSE POWER OR LARGER
- ◇ WELL DRILLED TO TEST FOR OIL OR GAS
- ◊ UNUSED WELL
- TEST WELL DRILLED BY W.P.A. LABOR
- ◐ EARTHEN TANK OR RESERVOIR
- SINK HOLE
