CALLAHAN COUNTY, TEXAS

* * *

Introduction
By
William O. George
Assistant Geologist
United States Geological Survey

This publication contains records of 216 wells and 7 springs, drillers' logs of 11 wells, logs of 18 test wells, and 167 chemical analyses of water obtained from water wells and springs in Callahan County, Texas.

On January 17, 1940 the Work Projects Administration started an inventory of the water resources of the county with a project sponsored by the State Board of Water Engineers in cooperation with the Federal Geological Survey, with Carl B. Mueller, as project superintendent. In addition to the inventory a number of test holes were put down by WPA labor. The project closed May 16, 1940. The City of Baird was also a co-sponsor for the project. Because of the large amount of work done in the vicinity of the Baird water-well field there was not time to complete the inventory of the county. This was done later by C. R. Follett.

The analyses were made by chemists employed on Work Projects Administration Project 10443 under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry of The University of Texas, and D. W. Lohr, Chemist of the Quality of Water Division of the Geological Survey; the Bureau of Industrial Chemistry furnished laboratory space and equipment. This release was typed by typists employed on that project.

The records serve as a guide to land owners, well drillers and others who need information regarding wells and springs, the depth to ground water in different parts of the county, and the quantity and chemical character of the water yielded by wells and springs. They afford a basis for the more intensive investigation that is now being carried on by the State Board of Water Engineers in cooperation with the Geological Survey. The purpose of this investigation is to determine the distribution and extent of available ground-water supplies and the safe yield of the underground reservoirs.

These projects are a part of a State-wide investigation of the underground water resources of Texas, and are sponsored by the Texas State Board of Water Engineers in cooperation with the United States Department of the Interior, Geological Survey. Acknowledgment of their cordial interest and cooperation is due the city officials of Baird.

Records of wells and springs in Callahan County, Texas

(All wells are dug unless otherwise noted in "Remarks" column.)

(See "Logs of W. E. . . test wells" for all records of test wells.)

| No. | Distance from Baird | Owner | Topo-graphic situa-tion | Date com-ple-ted | Depth of well (ft.) | Diam-eter of well (in.) | Height of measuring point above ground (ft.) |

a/ Measuring point usually top of casing, top of well curb or top of pipe clamp;
it was above ground level unless indicated by (-) sign for below ground level.

b/ B, bucket; C, cylinder; Cf, centrifugal; T, turbine; E, electric; G, gasoline;
H, hand; W, windmill. Number indicates horsepower.

(Chemical analysis from these wells are in the table of analysis.)

| No. | Water level Depth below measuring point (ft.) | Date of measurement | Pump and power b/ | Use of water c/ | Remarks |
|-----|--|---------------------|-------------------|-----------------|---|
| 1 | 14.36 | Apr. 9, 1940 | -- | P | Rectangular hole, 10 feet by 52 feet. Concrete lining and cover. Recently reconditioned for city supply. |
| 2 | 29 | e/ | Cf,E, 3 | P | Rectangular hole 15 feet by 30 feet and 36 feet deep. Concrete lining and cover. Hole deepened by drilling to 55 feet. Reported to have passed through clay and blue shale in drilled portion of hole. Yield small; probably less than 4,000 gallons a day. |
| 3 | 14.69 | Apr. 18, 1940 | None | N | Rectangular hole, $5\frac{1}{2}$ feet by 12 feet, not in use, formerly used by City of Baird. |
| 4 | 29.52 | Apr. 28, 1940 | T,E, 5 | P | Concrete lining. Estimated yield, 40,000 gallons a day. |
| 5 | 29.98 | Apr. 17, 1940 | C,E, 5 | P | Concrete lining. Estimated yield, 9,000 gallons a day. |
| 6 | 38.20 | do. | T,E, 3 | P | Concrete lining. Estimated yield, 2,500 gallons a day. |
| 7 | 34.48 | do. | Cf,E, 3 | P | Pump out of order. Reported yield, 6,500 gallons a day. |
| 8 | 36.60 | do. | Cf,E, 3 | P | Concrete lining. Estimated yield, 5,000 gallons a day. |
| 9 | 38.90 | do. | Cf,E, 3 | P | Concrete lining. Estimated yield, 20,000 gallons a day. |
| 10 | 36.85 | do. | Cf,E, 3 | P | Concrete lining. Pump out of order. Reported yield, 4,000 gallons a day. |
| 11 | 32.35 | do. | Cf,E, 3 | P | Well dug through sand 8 feet below bottom of old tunnel. Estimated yield, 20,000 gallons a day. |
| 12 | 34.58 | Apr. 19, 1940 | None | N | Concrete lining. Not used. |
| 18 | 28 | e/ | C,H | D,S | Abundant supply reported to come from sand. |
| 27 | 20.77 | Apr. 3, 1940 | B,H | -- | Abundant supply reported to come from sand. Altitude of measuring point 1,966 feet. |

Logs of test wells drilled by W. P. A. labor in Callahan County, Texas

| | Thickness (feet) | Depth (feet) |
|--|---------------------|-----------------|
|--|---------------------|-----------------|

Well 13

Flat, in City of Baird well field, $3\frac{1}{2}$ miles west of Baird.

| | | | |
|---|-----|----|----|
| Yellow sand - | - - | 2 | 2 |
| Sandy red clay | - - | 5 | 7 |
| Yellow sand - | - - | 2 | 9 |
| Sandy red clay | - - | 1 | 10 |
| Yellow sand and gravel- | 5 | 15 | |
| Red sand and gravel - | 6 | 21 | |
| Sandy yellow clay and small gravel - - | 3 | 24 | |
| Yellow clay | - | 2 | 26 |
| Red sand- - - | 2 | 28 | |

April 1, 1940.

Well 14

Flat, in City of Baird water field, $3\frac{1}{2}$ miles west of Baird. Altitude of ground surface, 1,960.

| | | | |
|---------------------------------------|-----|----|---|
| Yellow sand - | - - | 3 | 3 |
| Sandy yellow clay | - | 5 | 8 |
| White sand and small gravel - - - | 3 | 11 | |
| Yellow sand and small gravel - - - | 4 | 15 | |
| Sandy red clay - - | 2 | 17 | |
| Yellow sand and small gravel - - - | 3 | 20 | |
| Yellow sand - - - | 3 | 23 | |
| Yellow sand and gravel - - - | 6 | 29 | |

Water level, 27 feet below ground level,
72 hours after hole completed. April
24, 1940.

Well 15

Flat, in City of Baird water field, $3\frac{1}{2}$ miles west of Baird. Altitude of ground surface, 1,975.

| | | | |
|------------------------------------|----|----|--|
| Yellow sand and clay - | 14 | 14 | |
| Sandy red clay - - | 11 | 25 | |
| Yellow sand and clay - | 3 | 28 | |
| Yellow clay - - - | 3 | 31 | |
| Sandy red clay - - | 3 | 34 | |
| Sandy red clay and gravel - - - | 4 | 38 | |
| Yellow clay - - - | 4 | 42 | |

Water level, 35 feet below ground level,
24 hours after hole completed. April 24,
1940.

| | Thickness (feet) | Depth (feet) |
|--|---------------------|-----------------|
|--|---------------------|-----------------|

Well 16

Hillside, in City of Baird water field,
 $3\frac{1}{2}$ miles west of Baird. Altitude of
ground surface, 1,997.

Mostly sand (yellow and red) samples
ruined by rain before log made.

| | | |
|--------------------------|----|----|
| Red and yellow sand - | 31 | 31 |
| Sandy pink clay - - | 6 | 37 |
| Yellow sand - - - | 10 | 47 |
| Red sand and yellow clay | 1 | 48 |
| Fine-grained red sand - | 5 | 53 |

Struck water at 51 feet. Water level,
51 feet below ground level, 72 hours
after hole completed. April 8, 1940.

Well 17

Gentle slope, in City of Baird water
field, $3\frac{1}{2}$ miles west of Baird. Altitude
of ground surface, 1,982.

| | | |
|-----------------------------------|---|----|
| Yellow surface sand - | 2 | 2 |
| Sandy yellow clay - | 3 | 5 |
| Yellow sand - - - | 5 | 10 |
| Sandy yellow clay - | 5 | 15 |
| Fine white sand - - | 9 | 24 |
| Yellow sand - - - | 1 | 25 |
| Fine white sand - - | 3 | 28 |
| Yellow sand - - - | 4 | 32 |
| Red sand and fine gravel - - - | 2 | 34 |
| Yellow sand - - - | 2 | 36 |
| Red water sand - - | 3 | 39 |
| Red sand and gravel - | 2 | 41 |

Struck water at 37 feet. Water level,
37 feet below ground level, 24 hours
after hole completed. February 21, 1940.

Well 19

Gentle slope, in City of Baird water
field, $3\frac{1}{2}$ miles west of Baird. Altitude
of ground surface, 1,977.

| | | |
|---------------------------------------|---|----|
| Yellow surface sand - | 3 | 3 |
| Sandy yellow clay - - | 1 | 4 |
| Chalk, sand and clay - | 7 | 11 |
| Fine white sand - - | 4 | 15 |
| Gray sand and clay - - | 2 | 17 |
| Fine pink sand - - | 8 | 25 |
| Yellow sand and small gravel - - - | 1 | 26 |

Partial analyses of water from wells and springs in Callahan County, Texas

(Analyzed at The University of Texas under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry, and E. W. Lohr, Chemist, U. S. Department of the Interior, Geological Survey; by D. F. Riddell, and H. T. Davidson, Chemists; and Martin Wieland, Jack Ramsey and J. H. Raby, Assistant Chemists. Nitrate and fluoride determined by E. W. Lohr. Results are in parts per million. Well numbers correspond to numbers in table of well records.)

EXPLANATION

- WELL WITH HAND PUMP, BUCKET OR BAILER
- WELL WITH WINDMILL OR SMALL POWER PUMP
- ◎ WELL WITH PUMPING PLANT—5 HORSE POWER OR LARGER
- ◆ WELL DRILLED TO TEST FOR OIL OR GAS
- ◊ UNUSED WELL
- SPRING
- TEST WELL DRILLED BY W.P.A. LABOR
- ▲ EARTHEN TANK OR RESERVOIR
