CHEMICAL COMPOSITION OF TEXAS SURFACE WATERS, 1946

by

W. W. Hastings and B. Irelan

Introduction

This report includes the analyses made by the Geological Survey of samples collected regularly from streams in Texas during the year ended September 30, 1946. Quality of water records for previous years have been compiled in a recent report, "Chemical Composition of Texas Surface Waters, 1938-1945," by W. W. Hastings and J. H. Rowley.

The analyses given herewith were made by the United States Geological Survey in cooperation with the Texas Board of Water Engineers, City of Denison, City of Sherman, Red Bluff Water Power Control District, and the Lower Colorado River Authority. Space for the Geological Survey laboratory was furnished at the University of Texas by the Bureau of Industrial Chemistry, Dr. E. P. Schoch, Director.

The methods are those regularly in use and described in United States Water-Supply Paper 596-H, pages 236-261, 1928: "Notes on practical water analysis" by W. D. Collins. On the basis of specific electrical conductance, daily samples of similar composition were mixed together for analysis. At least three composites were made for each month as follows: samples for the first ten days, next ten days and the remainder of the month. For streams showing large changes in the quality of the water, composites were made more frequently, depending on the total salt content as indicated by measurement of the conductivity of the daily samples.

Weighted average analyses are given for certain stations where sampling was considered adequate. The weighted average analysis approximates the composition of the water that would be stored in a reservoir holding all of the flow for the entire year. The analyses are reported in parts per million.

Brazos River near South Bend, Texas, October 1, 1945 to September 30, 1946

Analyses of composites of daily samples collected at gaging station at bridge on Texas Highway No. 67, 0.3 mile upstream from Wichita Falls and Southern Railroad Bridge, 1.6 miles downstream from Clear Fork of Brazos River, and 2.0 miles northeast of South Bend. Drainage area 21,600 square miles.

Brazos River near South Bend, Texas, October 1, 1945 to September 30, 1946
(Continued)

Brazos River at Possum Kingdom Lake, near Graford, Texas, Oct. 1, 1945 to Sept. 30, 1946

Analyses of composites of daily samples collected immediately below dam on Brazos River, 2.6 miles upstream from Loving Creek and 11.3 miles southwest of Graford. Discharge records reported for Palo Pinto gaging station at bridge on Palo Pinto-Graford highway, 300 feet downstream from Dark Valley Creek and 6-1/2 miles north of Palo Pinto. The gage is about 15 miles downstream from Possum Kingdom Dam. No appreciable inflow between dam and gaging station except during period of heavy local rains. Drainage area above dam 22,550 square miles; above gaging station 22,760 square miles.

Quitaque Creek near Quitaque, Texas, November 1, 1945 to November 30, 1946

Analysis of composites of daily samples during November and December 1945 with individual samples on one day each month from January to November 1946, collected at road crossing about 4 miles below gaging station about $\frac{3}{4}$ mile upstream from W. F. Saul's ranch house and about a mile downstream from Wilson Creek.

Red River at Denison Dam near Denison, Texas, October 1, 1945 to September 30, 1946

Analyses of composites of daily samples collected immediately below dam on Red River, 1.7 miles upstream from Sand Creek and 5 miles north of Denison. Discharge records reported are for gaging station at old highway toll bridge 1.3 miles downstream from Sand Creek, 2 miles south of Colbert, Oklahoma. No appreciable inflow between dam and gaging station except during periods of heavy local rains. Drainage area 38,700 square miles above gaging stations.

DESCRIPTION OF SAMPLING POINTS

1. Brazos River near Glen Rose, Texas.
2. Brazos River near Glen Rose, Texas.
3. Brazos River near Whitney, Texas.
4. Brazos River near Whitney, Texas.
5. Brazos River at Waco, Texas.
6. Brazos River at Waco, Texas.
7. Brazos River near Bryan, Texas.
8. Clear Fork Brazos River near Breckenridge, Texas.
9. Clear Fork Brazos River near Stamford, Texas.
10. Colorado River near Bronte, Texas.
11. Concho River near Concho, Texas.
12. Keeche Creek near Grafton, Texas.
13. Little Wichita River near Henrietta, Texas.
14. Llano River at Llano, Texas.
15. West Fork Trinity River near Bridgeport, Texas.
