Introduction

by

Samuel F. Turner

Associate Hydraulic Engineer

U. S. Geological Survey

The purpose of this survey was to obtain information concerning existing wells and springs and the quantity and quality of water they yield, and put down test holes where additional information was needed.

This project was part of a statewide Works Progress Administration project known as a "Statewide Inventory of Water Wells," sponsored by the State Board of Water Engineers. The Division of Ground Water of the U. S. Geological Survey cooperated in the technical direction of the project and the Bureau of Industrial Chemistry of The University of Texas furnished laboratory space and equipment and supervised the chemical analyses.

The analyses were made by chemists employed on Works Progress Administration Project 6909 at Austin, Texas, sponsored by the State Planning Board and by the State Board of Water Engineers. This release was typed and assembled by typists and draftsmen employed on this project.

The field work in Martin County was started on December 16, 1935, and completed in July, 1936. This work was done as Project 4536 of District 18 of the Works Progress Administration, Big Spring, Texas. Joe W. Lang, a geologist, was project superintendent. Mr. Lang should be given credit for his great interest in the work and for the many extra hours he spent on the project. The office of the Works Progress Administration in the Big Spring District made this work possible by their constant help and cooperation.

This release contains the well and spring records and well logs obtained by the project superintendent, logs of the test holes drilled by the W. P. A. labor, and the chemical analyses of water from privately owned wells and springs. Locations of all wells and springs listed are shown on the folded map in the back of the release.

The test wells were drilled by W. P. A. labor using a soil auger, drop auger, churn drill, and a sand bucket. Samples were collected at one foot intervals by the well driller in charge of the party. The project superintendent studied these samples and compiled the logs.

Records of wells in Martin County, Texas

(All wells are bored or drilled unless otherwise noted in the remarks column)

Red sandy clay and clay- -	15	75

Notes in connection with wells 212 and 223, owned by the Martin County Fresh Water Supply Company, District No. 1.

There are 37½ sections in this district supplied by pipeline with fresh water from wells in the plains area west of the escarpment. This "Dry Flat", as it is called, has very few wells that furnish usable water. A few deep wells, all into red clay, have been drilled and these found heavily mineralized water at 300 to 500 feet. There is no shallow water except in the draws or sinks and most of this is not usable.

There are three systems in the district. The north system has 3 wells, the central system has 2 wells, and the south system has one well. The south system's well has 4 inch tubing, 3-¾ inch cylinder and 3½ horsepower gasoline engine or windmill. This well does not pump out and is able to supply the demand on it. The wells in the other two systems have 3 inch tubing, 2-¾ inch cylinders, and the same power as the south well. These wells will pump down and are unable to supply sufficient water. A well 30 feet from well 223 will pump out in 45 minutes. All of the wells except well 212, are less than 1,000

Notes on wells 212 and 223 Con'td. feet west of the escarpment. Well 212, is about ½ mile west of the escarpment and should furnish a large supply of water.

The contract with this company calls for an opening to their pipeline on every quarter section at a cost of \$40.00 and a rate of \$1.50 a month for 250 gallons a day.

Reported log of well 233.

Partial Driller's log of well 421. American Glycerin Co., owner. NW. $\frac{1}{4}$, NW. $\frac{1}{4}$, Sec. 17, T. 1 S, Blk. 35.

First water at 96 feet produced 8 gallons a minute.

From 100 to 150 feet a series of sandstone and gravel beds containing water. Red beds struck at 150 feet.

Tested at 27 gallons a minute with bailer. Tested at 35 gallons a minute with tubing & cylinder. Estimated production 50 gallons a minute with 6 inch turbine.

Another well drilled to red beds in the northwest corner of NE. $\frac{1}{4}$, NW. $\frac{1}{4}$, Sec. 17, produced only 6 gallons a minute. A third well to red beds in the northeast corner of NE. $\frac{1}{4}$, NW. $\frac{1}{4}$, Sec. 17, produced only 2 $\frac{1}{2}$ gallons a minute.

Reported log of well 444.

Yellow sandy clay- - - - -	3	7
Caliche with limestone boulders- - - - -	12	19
Water in sand- - - - -	1	20
Pink sandy clay with large and small gravel of many colors - 2		22

See table of water analyses.

Hole 166
In bottom of draw, 8¹/₂ miles southwest of
Ackerly, 0.3 mile north of southwest
corner Sec. 38, Blk. 35, T. 3 N.

Sand and sandy clay- - - - -	4	4
White sandy limy clay- - - - -	5	9
Caliche rock- - - - -	2	11
Yellow sandy clay- - - - -	8/	19

Hole 167
On sand hill, 9 miles southwest of Ackerly
0.1 mile south of corner of sections 66,
67, 48, and 38. Blk. 35, T. 3 N.

Red sand- - - - -	18	18
White sand- - - - -	6	24
Yellow limy sand- - - - -	2	26
Yellow spotted sandy clay (limy)- - - - -	7	33
Caliche rock - - - - -	2	35
Yellow sandy clay- - - - -	10	45

Hole 168
9 miles southwest of Ackerly in southwest
corner of Sec. 66, Bauer and Cockrell Suv.

Red sand and sandy red-brown clay- - - - -	18	18
Yellow sandy clay- - - - -	3/	21

Logs of W. P. A. test holes--Continued

Hole 169

On side of Sulphur Draw, 11 miles southwest of Ackerly, in SW. 1/4, NE. 1/4, Sec. 40, Blk. 35, T. 3 N.

	Thickness (feet)	Depth (feet)
Brown sand- - - - -	4	4
Yellow sandy clay with gravel	6	10
Coarse sand and gravel (salt water)- - - - -	4	14
See table of Water analyses.		

Hole 170

On side of Sulphur Draw, 11 miles southwest of Ackerly, in SW. 1/4, NE. 1/4, Sec. 40, Blk. 35, T. 3 N.

	Thickness (feet)	Depth (feet)
Brown sand- - - - -	1	1
Yellow sandy clay - - - - -	8	9
Black gumbo - - - - -	1	10
Coarse sand and gravel with water (salt) - - - - -	3	13
See table of Water analyses.		

Hole 175

12 miles southwest of Ackerly, NE. 1/4, NW. 1/4, Sec. 29, T. 3 N., Blk. 36.

	Thickness (feet)	Depth (feet)
Red sand- - - - -	4	4
Brown pack sand - - - - -	5	9
Yellow clay with some lime pebbles- - - - -	2	11
Brown sand- - - - -	4	15

Hole 176

In bottom of draw, 13 miles southwest of Ackerly, NW. 1/4, NW. 1/4, Sec. 29, T. 3 N., Blk. 36.

	Thickness (feet)	Depth (feet)
Brown sandy soil- - - - -	4	4
Clay and caliche rock - - - - -	6	10
Struck rock- - - - -		10

Hole 182

In bottom of small draw, 14 miles southwest of Ackerly, SE. 1/4, NE. 1/4, Sec. 3, T. 3 N., Blk. 36.

	Thickness (feet)	Depth (feet)
Black sandy loam- - - - -	5	5
Yellow sandy clay - - - - -	10	15
Yellow clay and gravel- - - - -	2	17
Struck caliche rock,		

Hole 183

12 1/2 miles southwest of Ackerly, NE. 1/4, NE. 1/4, Sec. 12, T. 2 N., Blk. 36.

	Thickness (feet)	Depth (feet)
Brown sand- - - - -	4	4
Red clay- - - - -	4	8
Limy clay (yellow) with rock and pebbles- - - - -	12	20

Hole 186

12 miles southwest of Ackerly, in NW. corner of Sec. 4, T. 2 N., Blk. 35.

	Thickness (feet)	Depth (feet)
Brown sand and sandy clay- -	4	4
Yellow sandy clay and clay -	10	14
Struck rock (caliche)- - - -		14

Hole 189

11 miles south of Ackerly, on side of hill in Northwest corner of Sec. 7, T. 2 N., Blk. 35.

	Thickness (feet)	Depth (feet)
Brown sand and sandy clay- -	2	2
Red sand and clay- - - - -	5	7
Caliche (solid rock) - - - - -	1 1/2	7 1/2
Second hole 200 feet away.		
Brown sand and sandy clay- -	2	2
Red sandy clay- - - - -	3	5
Yellow sandy clay - - - - -	5	10
Struck rock- - - - -		10

Hole 192

14 1/2 miles southwest of Ackerly, SE. 1/4, SE. 1/4, Sec. 10, T. 2 N., Blk. 36.

	Thickness (feet)	Depth (feet)
Brown sandy soil- - - - -	3	3
Yellow sandy clay - - - - -	7	10
Caliche rock- - - - -	3	13
Yellow clay- - - - -	5	18
Red clay- - - - -	3 1/2	21

Hole 201

15 miles northwest of Stanton, southwest corner of Sec. 20, T. 2 N., Blk. 36.

	Thickness (feet)	Depth (feet)
Brown sandy clay soil- - - - -	4	4
Yellow clay, trace of sand - -	6	10
Caliche rock- - - - -		10

Hole 203

In broad valley flat, 15 miles north of Stanton, southwest corner of Sec. 24, T. 2 N., Blk. 36.

	Thickness (feet)	Depth (feet)
Brown sandy clay- - - - -	3	3
Yellow limy, sandy, clay- - -	20 1/2	23

Hole 204

In bottom of dry lake, 15 miles north of Stanton, southwest corner of Sec. 11, T. 2 N. Blk. 35.

	Thickness (feet)	Depth (feet)
Black soil- - - - -	3	3
Red sandy clay- - - - -	5	8
White sand- - - - -	4	12
Yellow clay - - - - -	3	15
Water at 16 feet.		
White sand with gravel- - - -	2	17
Red sandy clay and gravel - -	2	19
See table of water analyses.		

Logs of W. P. A. test holes --Continued

Hole 206

In bottom of small sink, 15 miles north of Stanton, southeast corner of Sec. 11, T. 2 N., Blk, 35.

	Thickness (feet)	Depth (feet)
Black gumbo clay- - - - -	2	2
Yellow clay(some sand)- - - -	12 1/2	14

Hole 207

In bottom of Sulphur Draw, 16 miles north of Stanton, in northeast corner of Sec. 13, T. 2 N., Blk. 35.

Black gumbo clay- - - - -	5	5
Water at 6 feet.		
Fine white sand(quicksand)- -	3	8
Second test hole 600 feet east.		
Brown sand and red-brown sandy clay- - - - -	9	9
Yellow sandy clay and caliche	2 1/2	11

Hole 209

14 1/2 miles north of Stanton, 0.1 mile west of northeast corner Sec. 27, T. 2 N., Block. 35.

Sandy soil- - - - -	4	4
Yellow clay- - - - -	11	15
Brittle caliche rock - - - -	6 1/2	21

Hole 213

13 1/2 miles north of Stanton, in northwest corner of Sec. 22, T. 2 N., Blk. 35.

Brown sandy clay- - - - -	4	4
Yellow sandy clay- - - - -	10	14

Hole 214

In bottom of draw, 14 miles north of Stanton, in southwest corner of Sec. 17, T. 2N., Blk. 35.

Black loam- - - - -	1	1
White limy sandy clay - - - -	13	14
Coarse gravel and sand- - - -	2	16
Water at 15 feet.		
White water sand-with gravel- -	2	18
Red clay with gravel and sand	1 1/2	19
See table of water analyses.		

Hole 215

13 1/2 miles north of Stanton, southwest corner of Sec. 24, T. 2 N., Blk, 35.

Brown sandy clay- - - - -	3	3
White limy sandy clay- - - - -	6	9
Pink sandy limy clay - - - - -	7	16
Struck rock at 16 feet.		
Second hole 600 feet north of-215.		
Brown sandy clay- - - - -	3	3
Yellow to white clay and sandy lime- - - - -	6	9
Pink sandy clay- - - - -	6 1/2	15

Hole 220

13 miles north of Stanton, NW. corner of Sec. 32, T. 2 N., Blk. 35.

	Thickness (feet)	Depth (feet)
Brown sandy loam- - - - -	3	3
Yellow limy clay- - - - -	17	20
Struck limestone boulder or hard caliche at 20 feet.		

Hole 220a

In bottom of dry lake, 13 miles north of Stanton, NW. 1/4, NW. 1/4, Sec. 30, T. 2 N., Blk, 35.

Black gumbo- - - - -	3	3
White sand- - - - -	3	6
Yellow clay (little sand) - -	4	10
Water at 12 feet.		
Yellow to white clayey sand, very limy- - - - -	4	14

Hole 221

12 miles north of Stanton, in southeast corner of Sec. 38, T. 2 N., Blk, 36.

Sandy brown soil- - - - -	3	3
White sandy lime, dry and hard- - - - -	9 1/2	12
Two other holes were dug 0.5 mile west of 221 and both were on hard caliche or limestone at 4 feet and 6 feet.		

Hole 225

12 miles north of Stanton, in southwest corner of Sec. 40, T. 2 N., Blk. 36.

Sandy brown clay- - - - -	4	4
Yellow sandy lime - - - - -	6 1/2	10
(Very dry and hard)		

Another hole was drilled 0.7 mile south of 225 - in a dry lake bottom. Hard dry gumbo very hard to dig- - - - - 7 7
Solid rock was struck in lake bottom 1 mile southeast of this location at depths of 4 to 12 feet.

Hole 227

13 1/2 miles northwest of Stanton northwest corner of Sec. 42, T. 2 N., Blk. 36.

Red sandy soil- - - - -	3	3
Yellow clay- - - - -	2	5
Caliche rock - - - - -		5
Second hole in lake bed west of 227.		
Brown clay- - - - -	4	4
Yellow sandy clay- - - - -	3	7
White sandy limy clay - - - -	7 1/2	14

Logs of W. P. A. test holes--Continued

Hole 235

On top of small hill, 13 miles north of Stanton, 0.4 miles north of southwest corner of Sec. 38, T. 2 N., Blk. 35.

	Thickness (feet)	Depth (feet)
Brown sandy clay top soil-	3	3
Brown limy sand-	1	4
White lime and sandy clay-	10	14
Light brown to reddish-brown sand and sandy clay-	9 1/2	23

Hole 236

In bottom of Sulphur Draw, 0.5 mile north of southwest corner of Sec. 1, T. 1 N., Blk. 35.

Brown sandy clay-	3	3
White sand - salty-	5	8
Quicksand and gravel with water-	3	11
Red clay with yellow spots and blue streaks - also gypsum crystals and pockets-	2 1/2	13

See table of water analyses.

Hole 238

In bottom of lake, 10 miles north of Stanton, in southwest corner of Sec. 3, T. 1 N., Blk. 36.

Black gumbo clay-	3	3
Yellow limy sandy clay-	1	4

Solid rock at 4 feet.
Hole 238-A, 600 feet north of 238. Same log except solid rock was hit at 10 feet.

Hole 238-B, 600 feet south of 238-A. Same log- rock at 12 feet.

Hole 245

In sand hills, 12 miles northwest of Stanton, in southwest corner of Sec. 2, T. 1 N., Blk. 37.

Red sand-	7	7
Greenish-Yellow sandy clay- more sand than limy-clay -	5	12
Blue sandy clay-	2	14
White lime, changes to yellow	2	16
Yellow gravelly (lime pebbles) and clayey sand-	5 1/2	21

Hole 246

In bottom of Mustang Draw, 14 miles northwest of Stanton, N.W. 1/4, NE. 1/4, Sec. 7, T. 1 N. Blk. 37.

Dark brown sandy clay soil-	4	4
Limy sandy clay-	3	7
Limy sandy gravel with snail shells and small fossils-	1	8
Limestone boulders-	1 1/2	9

Quit hole in very hard caliche and flint boulders - like quartzite at 9 feet.

Hole 249

In bottom of dry lake, 10 miles northwest of Stanton, 0.4 mile north of southwest corner of Sec. 7, T. 1 N., Blk. 3

	Thickness (feet)	Depth (feet)
Black gumbo clay-	6	6
White sand-	2	8
Yellow sandy clay-	9	17
White sandy clay-	2	19
Red sand with boulders (lime-stone and sandstone)-	2	21
Quit on solid limestone	-	21

Hole 250

10 miles north of Stanton, northwest corner Sec. 9, T. 1 N., Blk. 36.

Brown sandy clay-	3	3
Yellow limy sandy clay-	2	5

Solid rock-limestone at 5 feet.
Hole 250-A 1 mile south of 250; had same log with solid rock at 5.5 feet.

Hole 255

In bottom of draw, 11 miles northeast of Stanton, SW. 1/4, SE. 1/4, Sec. 12, T. 1 N., Blk. 35.

Brown sandy clay soil-	6	6
Quicksand-	4	10

Peg-gravel at bottom. Hit water at 10 feet. See table of water analyses.

Hole 259

In bottom of dry lake, 9 miles north of Stanton, 0.3 mile south of northwest corner of Sec. 15, T. 1 N., Blk. 36.

Black gumbo clay-	5	5
Yellow limy clay with streaks of sand and calcareous material	13	18

Quit hole at 18 feet on solid limestone. Drilled hole in bottom of dry lake 0.8 mile north of 259 and hit solid rock at 4 feet.

Hole 263

13 miles northwest of Stanton, northwest corner Sec. 10, T. 1 N., Blk. 37.

Red sand and sandy clay-	12	12
Yellow sandy limy clay-	14	26

Quit in caliche and broken limestone rock.

Hole 266

In sandhills, 9 miles northwest of Stanton, northeast corner of Sec. 24, T. 1 N., Blk. 37.

Red sand and blow sand-	2	2
Sandy red clay-	4	6
Solid rock-caliche-	-	6

Two other test holes were dug 0.1 and 0.2 mile SW. along sec. line. Black to brown sandy clay at top. Hit caliche at 5 feet.

Logs of W. P. A. test holes--Continued

Hole 269

In small draw, 8¹/₂ miles northeast of Stanton, 0.5 mile north of southwest corner of Sec. 22, T. 1 N., Blk, 35.

	Thickness (feet)	Depth (feet)
Brown sandy clay- - - - -	3	3
Pink-yellow sandy clay- - - - -	2	5
Red clay- - - - -	14 ¹ / ₂	19

Hole 274

In valley flat, 9 miles northeast of Stanton, southeast corner of Southwest ¹/₄, Sec. 25, T. 1 N., Blk. 35.

Brownish-yellow sandy clay- - -	2	2
Yellow sandy clay- - - - -	1	3
White sand and gravel- - - - -	2	5
Reddish-yellow sand and gravel, damp- - - - -	2	7
Red clay- - - - -	5 ¹ / ₂	12

Hole 275

On ridge, 8 miles northeast of Stanton, SE.¹/₄, SE.¹/₄, Sec. 27, T. 1 N., Blk, 35.

Brown sandy top soil- - - - -	3	3
Caliche (solid rock)- - - - -	1 ¹ / ₂	4 ¹ / ₂
Caliche (yellow limy clay)- - -	5 ¹ / ₂	10
Pink limy clay- - - - -	10	20
Pink limy shale (almost a limestone with mica specks) - -	7 ¹ / ₂	27

First 18 feet of this hole was a dug well and last 9 feet was test well.

Hole 276

8 miles northeast of Stanton, in northwest corner of Sec. 27, T. 1 N., Blk, 35.

Brown sandy clay- - - - -	4	4
Pink sandy clay and gravel- - -	14	18
Red clay- - - - -	2 ¹ / ₂	20

Hole 277

7 miles northeast of Stanton, southwest corner of Sec. 29, T. 1 N., Blk, 35.

Wind blown sand (red)- - - - -	2	2
Red sandy clay- - - - -	3	5
Yellow sandy clay - - - - -	2	7
Caliche (some sand), rock and gravel - - - - -	1 ¹ / ₂	8

Hole 281

8 miles northwest of Stanton, in northeast corner of Sec. 25, T. 1 N., Blk, 37.

Sandy red clay and sand- - - - -	2	2
Limy clay-sandy- - - - -	1 ¹ / ₂	3 ¹ / ₂
Caliche- - - - -		3 ¹ / ₂

3 holes dug here about 200 yards apart-all struck caliche at 3 to 5 feet deep. Another hole 0.5 mile north of 281.

Hole 281--Continued

	Thickness (feet)	Depth (feet)
Sandy brown clay- - - - -	5	5
Red to yellowish sandy clay - -	6	11
Hit solid rock at 11 feet (caliche or limestone) - - -		11

Hole 286

In broad flat, 12 miles northwest of Stanton, NW.¹/₄, NE.¹/₄, Sec. 31, T. 1 N. Blk. 35

Red sand and sandy clay- - - - -	4	4
Yellow sandy limy clay - - - - -	6	10
Quit on caliche (solid rock)		

Hole 287

11 miles west of Stanton, southwest corner of Sec. 32, T. 1 N., Blk, 37.

Brown sandy clay- - - - -	2	2
Quit on solid rock- - - - -		2
Hole on hill - 600 feet southwest of 287		
Brown sandy clay- - - - -	3	3
White sandy clay- - - - -	5	8
Quit on rock- - - - -		8
Hole 0.4 mile east of 287.		
Brown sandy clay- - - - -	3	3
Blue-brown sandy clay - - - - -	8	11
White limy (sandy) clay - - - - -	1	12
Quit on rock- - - - -		12

Hole 288

In bottom of Mustang Draw, 9 miles northwest of Stanton, in center of Sec. 3 T. 1 N., Blk. 37.

Black loam (sandy clay)- - - - -	5	5
Red sandy clay- - - - -	2	7
White sandy lime - - - - -	7	14
Limestone boulders - - - - -	1	15
Quit hole at 15 feet on solid lime rock.		

Hole 297

On valley flat, 5¹/₂ miles north of Stanton, 0.5 mile north of southwest corner of Sec. 32, T. 1 N., Blk, 35.

Black sandy loam- - - - -	2	2
White sandy lime- - - - -	4	6
Pink sandy clay - - - - -	3	9
Damp sand and gravel with small rocks- - - - -	3	12
Red joint clay- - - - -	8 ¹ / ₂	20

Hole 300

On hillside, 6¹/₂ miles northeast of Stanton southwest corner of Sec. 34, T. 1 N., Blk

Dug well 15 feet deep (dry)		
Yellow-brown sandy clay- - - - -	1	1
Gray micaceous sandstone- - - - -	10	11
Red shale and clay- - - - -	12 ¹ / ₂	23

Logs of W. P. A. test holes--Continued

Hole 301

7 $\frac{1}{2}$ miles northeast of Stanton, southwest corner of Sec. 35, T. 1 N., Blk. 35.

	Thickness (feet)	Depth (feet)
Red sandy clay-	2	2
Red joint clay-	2	4
Red caliche (marl)-	1	5
Red sand-	2	7

Hole 303

In bottom of draw, 3 $\frac{1}{2}$ miles northeast of Stanton, SW $\frac{1}{4}$, NW $\frac{1}{4}$, Sec. 30, T. 1 N., Blk. 35.

Sandy brown soil-	3	3
White sand with calcareous material-	3	6
Red pecksand with gravel scattered thru it. Sand and gravel mixed with clay at bottom (some coarse gravel)-	5	11
Red clay-	21	32

A number of test holes were dug within a radius of $\frac{1}{2}$ mile; and all found red clay at 5 to 15 feet.

Hole 307

On side of ridge, 7 $\frac{1}{2}$ miles northeast of Stanton, northeast corner of Sec. 47, T. 1 N., Blk. 35.

Red sand-	2	2
Sandy red clay-	1	3
Lighter red sandy clay-	1	4
Limy clay, some sand-	2 $\frac{1}{2}$	6

Hole 309

Well in bottom of draw, 6 $\frac{1}{2}$ miles northeast of Stanton, southeast corner of Sec. 39, T. 1 N., Blk. 35.

Black sandy clay-	2	3
Red clay - some sand-	2	4
Gray limy clay- some sand-	1 $\frac{1}{2}$	5

Hole 310

In bottom of draw, 6 miles northeast of Stanton, 0.1 mile north of southeast corner of Sec. 39, T. 1 N., Blk. 35.

Brown sandy clay (moist)-	3	3
Red clay-little sand-	5	8
White sandy clay-	1	9
Yellow and white sandy clay (not much sand)-	2	11
Greenish sand with some clay and gravel-	5	16
No water.		

Hole 311

In bottom of draw, 6 $\frac{1}{2}$ miles northeast of Stanton, northwest corner of Sec. 39, T. 1 N., Blk. 35.

	Thickness (feet)	Depth (feet)
Brown sandy clay soil-	3	3
Red sandy clay-	2	5
Yellow clay-	3	8
Water in gravel-	2	10
Sandy clay-	1	11

Hole 313

4 $\frac{1}{2}$ miles north of Stanton, southwest corner of Sec. 42, T. 1 N., Blk. 35.

Reddish sandy loam-	1	1
Caliche rock-	1	2
Calcareous material-	1 $\frac{1}{2}$	3

Hole 314

4 miles north of Stanton, southeast corner Sec. 39, T. 1 N., Blk. 36.

Red sandy clay-	3	3
Yellow sandy clay very limy but moist-	8	11

Hole 316

4 $\frac{1}{2}$ miles northeast of Stanton, southeast corner Sec. 40, T. 1 N., Blk. 36.

Red sand and clay-	2	2
Caliche - hard rock-	1	3
Yellow sandy clay (very moist)-	3	6
Hit limestone rock-or caliche-	1	7

Hole 319

4 $\frac{3}{4}$ miles northeast of Stanton, southeast corner Sec. 40, T. 1 N., Blk. 36.

Red sand and sandy clay-	3	3
Yellow sandy clay, calcareous, damp-	4	7
Hard caliche (had to quit hole)		7

Hole 322

6 miles northeast of Stanton, northeast corner of Sec. 42, T. 1 N., Blk. 36.

Brown sandy clay-	4	4
Yellow sandy clay-	9	13
Caliche rock-		13

Hole 325

6 $\frac{1}{2}$ miles northeast of Stanton, northwest corner of Sec. 42, T. 1 N., Blk. 36.

Brown sandy clay-	4	4
Change to lighter color brownish-yellow sandy clay	4	8
Hard yellow clay-	8	16

Logs of W. P. A. test holes--Continued

Hole 329

7 1/2 miles west of Stanton, southwest corner of Sec. 39, T. 1 N., Blk. 37.

	Thickness (feet)	Depth (feet)
Sandy brown clay- - - - -	4	4
Sandy yellow clay- - - - -	15 1/2	19
Quit hole in rock boulders or hard caliche- - - - -		19

Hole 330

In bottom of Mustang Draw, 8 1/2 miles northwest of Stanton, NW. 1/4, NE. 1/4, Sec. 39, T. 1 N., Blk. 37.

Red sand and sandy clay- - - -	6	6
Caliche and limestone boulders	2	8

Hole 331

On side of sandy ridge, 10 miles northwest of Stanton, northwest corner Sec. 40, T. 1 N., Blk. 37.

Red sand and sandy loam- - - -	5	5
Yellow sandy clay with lime- -	4	9
Very limy caliche - like sandy clay- - - - -	3 1/2	12

Hole 351

3 miles north of Stanton, southwest corner of Sec. 47, T. 1 N., Blk. 36.

Red sandy clay- - - - -	3	3
Yellow clay - trace of sand -	2	5
Yellow limy sandy clay- - - -	5 1/2	10

Hole 353

5 1/2 miles northeast of Stanton, southwest corner of Sec. 46, T. 1 N., Blk. 35.

Red sandy clay- - - - -	3	3
Caliche rock- - - - -	1	4
Yellow limy clay- - - - -	10 1/2	14
(small rocks intermixed)		

Hole 354

In bottom of draw, 6 1/2 miles northeast of Stanton, center of NW. 1/4, Sec. 47, T. 1 N., Blk. 35.

Sandy pink clay- - - - -	4	4
Sand and gravel with water in lower 1 1/2 feet- - - - -	3	7
See table of water analyses.		

Hole 355

In bottom of draw, 7 miles northeast of Stanton, northwest corner of NE. 1/4, Sec. 47, T. 1 N., Blk. 35.

Sandy red clay- - - - -	3	3
Coarse sand and gravel- - - -	3	6
Water in the sand and gravel about 6 feet deep.		
See table of water analyses.		

Hole 357

On side of long ridge, 6 miles northeast of Stanton, NW. 1/4, NE. 1/4, Sec. 2, Blk. 35.

	Thickness (feet)	Depth (feet)
Top soil of sandy clay- - - -	2	2
Yellow sandy clay- - - - -	4	6
Pink sandy clay- - - - -	1	7
Quit on lime rock and small boulders.		

Hole 358

In Blue Wood Flat, 2 1/2 miles north of Stanton, southeast corner of Sec. 1, T. 1 S., Blk. 36.

Black sandy joint clay- - - -	2 1/2	2 1/2
Brown clay with some moisture	2 1/2	5

Hole 359

3 miles north of Stanton, northeast corner, Sec. 1, T. 1 S., Blk. 36.

Sand and sandy loam- - - - -	2	2
Red sandy clay and very damp	3	5
Sandy yellow limy clay - - -	9	14

Caliche rock- - - - -	¹ / ₂	6

Hole 672

In bottom of Mustang Draw, 9 miles south east of Moore's Hill School, SW.¹/₄, SW.¹/₄, Sec. 35, T. 2 N., Blk., 37.

Black gumbo clay- - - - -	3	3
Yellow clay with sand under- neath- - - - -	2	5
Water at 5 feet.		
White sand with water- - - - -	1 ¹ / ₂	6

See table of water analyses.

Hole 678

In bottom of draw, 7 miles south of Moore's Hill School, NW.¹/₄, SW.¹/₄, Sec. 1, M. B. & A. Survey, Blk. 39.

Black gumbo- - - - -	2	2
Yellow sand- - - - -	19	21
Coarse sand and gravel (water)		21
Coarse sand and gravel - - -	3	24

See table of water analyses.

Hole 679

In bottom of draw, 7 miles south of Moore's Hill School, on east side of Sec. 4, ¹/₂ mile north of southeast corner, T. 1 N., Blk. 39.

Black gumbo- - - - -	2	2
Yellow sand- - - - -	15	17
Red sand- - - - -	4	21
Water at 21 feet.		
White sand- - - - -	2 ¹ / ₂	23

See table of water analyses.

Hole 688

9¹/₂ miles southeast of Moore's Hill School, and 1 mile north of Bodgett School, NW.¹/₄, NE.¹/₄, Sec. 5, T. 1 N., Blk. 3

Red sand and sandy clay- - -	4	4
Yellow limy clay- - - - -	6 ¹ / ₂	10

Hole 689

10 miles southeast of Moore's Hill School, at Bodgett School southwest corner Sec. 5, T. 1 N., Blk. 38.

Brown sandy soil and sandy brown clay- - - - -	4 ¹ / ₂	4 ¹ / ₂
Yellow clay- - - - -	4 ¹ / ₂	9
Quit on rock (caliche)- - - -		9

Two other holes nearby hit rock at 7 feet.

Logs of W. P. A. test holes--Continued

Hole 693

In bottom of large dry lake, 10 miles southeast of Moore's Hill School, southwest corner of Sec. 14, T. 1 N., Blk. 38.

	Thickness (feet)	Depth (feet)
Black gumbo (salt crust) - - -	1 $\frac{1}{2}$	1 $\frac{1}{2}$
Iron colored sand with some clay and gypsum crystals - - -	2	3 $\frac{1}{2}$
Water, (highly mineralized), at 3 $\frac{1}{2}$ feet.		
Red gumbo clay which dries to a brittle shale with gypsum crystals - - - - -	2 $\frac{1}{8}$	6
See table of water analyses.		
Lake holds water during wet seasons.		

Hole 701

In bottom of lake bed, 11 miles south of Moore's Hill School, NW. $\frac{1}{4}$, NW. $\frac{1}{4}$, Sec. 25, T. 1 N., Blk. 39.

	Thickness (feet)	Depth (feet)
Black gumbo - - - - -	7	7
Yellow clay - - - - -	5	12
Coarse yellow sand - - - - -	1	13
Caliche rock - - - - -	1 $\frac{1}{4}$	14
Second hole dug $\frac{1}{4}$ mile north on rim of lake.		
Lime rock - - - - -	5	5

Partial analyses of water from wells in Martin County, Texas.

(Analyzed at the State University under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry, by J. E. Stullken, C. R. Stewart, D. F. Riddell, and Alfred J. Kelly, Chemists, and J. A. Harmaza, Martin Wieland and Jack Ramsey, Assistant Chemists. Results are in parts per millicn. Well numbers correspond to numbers in table of well records.)

(Analysis by State Department of Health. Also gives: Iron, 0.1; and Fluoride, 2.0 parts per million.)

a/ Sulphate less than 5 parts per million.

MAP OF MARTIN COUNTY, TEXAS

SHOWING LOCATIONS OF WATER WELLS LISTED IN THIS REPORT

- EXPLANATION -

FIELD WORK BY
JOE W. LANG
PROJECT SUPERINTENDENT

BASE COMPILED FROM
LAND OWNERSHIP MAP
AND FIELD NOTES

- WELL WITH WINDMILL, HAND PUMP OR SMALL POWER PUMP
- WELL WITH PUMPING PLANT 5 HORSEPOWER OR LARGER
- ◇ UNUSED WELL
- ◊ WELL DRILLED TO TEST FOR OIL OR GAS
- q SPRING

- △ U.S.C.&G.S. BENCHMARK, WITH NUMBER SHOWING ALTITUDE ABOVE SEA LEVEL
- RAILROAD
- TEST WELL DRILLED BY W.P.A. LABOR
- SCHOOLHOUSE
- IMPROVED ROAD
- - - UNIMPROVED ROAD

- "DRY LAKE" WITH NUMBER INDICATING DEPTH BELOW GENERAL GROUND LEVEL
- HILL, WITH NUMBER INDICATING ELEVATION ABOVE GENERAL GROUND LEVEL
- ESCARPMENT

TEXAS BOARD OF
WATER ENGINEERS
