YOAKUM COUNTY, TEXAS

Records of wells, drillers' logs, water analyses,
and map showing locations of wells

Prepared in cooperation with the United States
Department of the Interior, Geological Survey

May 1945

YOAKUM COUNTY, TEXAS

By

G. H. Cromack

Introduction

This publication contains records of 148 wells, drillers' logs of 44 wells and partial chemical analyses of water from 105 wells. It also includes a map on which the wells listed in the tables are shown, each well being given a number on the map corresponding to the number assigned to it in the tables.

The field data were obtained by the writer in October and November, 1944, in connection with a state-wide program of ground-water investigations in Texas conducted by the State Board of Water Engineers in cooperation with the United States Department of the Interior, Geological Survey.

The water analyses were made by W. W. Hastings and J. H. Rowley, chemists of the Quality of Water Division of the Federal Geological Survey. The results of the analyses, which relate only to the mineral constituents in the water, and not to its sanitary character, are tabulated in parts per million.

The publication should serve as a guide to landowners, officials of industrial plants, well drillers and others who need ground water information for different parts of Yoakum County. A limited number of copies are available for free distribution. They may be obtained by addressing a request to Mr. C. S. Clark, Chairman, Texas State Board of Water Engineers, 302 West 15th Street, Austin 14, Texas.

Records of wells in Yoakum County, Texas

Partial analyses of water from wells in Yoakum County, Texas

Analyzed at The University of Texas under the direction of W. W. Hastings, Chemist, U. S. Department of the Interior, Geological Survey, and Dr. E. P. Schuch, Director of the Bureau of Industrial Chemistry. Results are in parts per million. Well numbers correspond to numbers in table of well records.

| Well | Owner | Depth of well (ft.) | Date of collection | Total dissolved solids | Cal- cium (Ca) | Magne- sium (Mg) | Sodium and Potassium (Na + K) (calc.) | Bicar- bonate (HCO ₃) | Sul- fate (SO ₄) (turb.) | Chlo- ride (Cl) | Fluor- ide (F) | Ni- trate (NO ₃) | Total hardness as CaCO ₃ (calc.) |

a/ Total hardness by soap method.

b/ Sulfate determined.

✓ 50₄ and C₁ less than 250 ppm
 ✓ S₀₄ or C₁ more than 250 ppm
 ✓ S₀₄ or C₁ between 175 and 250 ppm

EXPLANATION

- WELL WITH WINDMILL OR SMALL POWER PUMP
- WELL WITH PUMPING PLANT - 5 HORSE-POWER OR LARGER
- UNUSED WELL
- WELL DRILLED TO TEST FOR OIL OR GAS
- U.S. OR TEXAS HIGHWAY
- COUNTY ROAD
- RANCH TRAIL
